INDEX TO VOLUME 41

Accessory-growth-factor requirements of *Brucella*. Abstract..... 37
— requirements of the genus *Pasteurella*. Abstract..... 38
Acetylmethylcarbinol, The microbiological formation of. Abstract..... 22
Acid-fast organisms, The value of fluorescence microscopy for demonstrating. Abstract..... 275
Acid production by oral bacteria associated with dental caries. Abstract.. 78
Actinomyces antibioticus nov. sp., a new antagonist against microorganisms. Abstract..... 32
Adiabatic fermentation apparatus, An. Microbial thermogenesis in the decomposition of plant materials. Part I..... 689
Aerobacilli, Biochemical studies of the. Abstract..... 265
Aerobacter cloacae, Variation in gas production by. Abstract..... 28
Aerobic and anaerobic bacteria, The action of "Visking"-sausage-casing-material upon the growth of. Abstract..... 99
—, micro-aerophilic and anaerobic conditions, The maintenance of, in a Petri dish..... 155
— sporulating bacilli, The bactericidal effect of cultures of, on gram-negative organisms. Abstract..... 32
Agar, A method for determining the hardness of. Abstract..... 48
Agglutinative types of β-hemolytic streptococci. Abstract..... 70
Agglutinogenic relationships of the phases. Studies with *Hemophilus pertussis*. V..... 447
Air of operating rooms, The bacterial content of the. Abstract..... 270
—, The efficiency of glass wool filters in removing bacteria from. Abstract.. 270
Alcohol, The effect of, on the bactericidal action of certain germicides. Abstract..... 35
Aldolase equilibrium, Occurrence of the, in bacterial metabolism. Abstract. 21
Alford, John A., Tobin, Leonard, and McCleskey, C. S. The bacterial flora of iced, fresh crabmeat. Abstract..... 96
Allergic reactions, A new procedure for determining changes in serum antitrypsin associated with. Abstract..... 62
Alpha hemolysin, The production of staphylococcus enterotoxin and, in a simplified medium..... 305
Alpha-hydroxyisobutyric acid ("Hib acid"), The non-assimilability of, by molds and other microorganisms. Abstract..... 43
Anaerobes, Preliminary report on the gram-positive non-sporulating, of intestinal origin. Abstract..... 685
Anaerobic bacteria of intestinal origin, Growth of non-sporulating, in synthetic media. Abstract..... 42
— citrate dissimilation, The mechanism of, by cell suspensions of *Streptococcus paracitrovorus*. Abstract..... 19

Anaerobic cultures, A modification of Rosenthal's chromium-sulfuric acid method for..... 301
— dissimilation, The, of citric acid by cell suspensions of *Streptococcus paracitrovorus*..... 675
Anaphylaxis, Blood platelets in. Abstract..... 63
—, Some recent studies in. Abstract. (No abstract.)..... 547
Anderson, Thomas F. Electron micrographs of further biologic specimens. Abstract..... 260
—, and Morton, Harry E. Electron-microscopic studies of the reduction of potassium tellurite by *Corynebacterium diphtheriae*. Abstract..... 25
—, Mudd, Stuart, and Polevitsky, Katherine. Structural differentiation within the bacterial cell as shown by the electron microscope. Abstract..... 25
Antibacterial properties, Certain, of saliva and tears not due to lysozyme. Abstract..... 77
Antibacteriophage serum, A study of the neutralization of bacteriophage by. Abstract..... 60
Antigen, A new, obtained from the elementary bodies of vaccinia. Abstract..... 57
Antimeningococcal preparations, The relationship of mouse-protective activity to the agglutinin and precipitin content of therapeutic. Abstract..... 72
Antipertussis sera, Nonspecificity of, when measured by passive protection tests in mice. Abstract..... 68
Antipneumococcal serum, The use of sodium desoxycholatelysed pneumococci as antigen for the production of. Abstract..... 69
Aronson, Joseph D., Saylor, Robert M., and Parr, Erma I. Incidence of coccidioimycosis in some parts of the United States. Abstract..... 262
Ascorbic acid, Effect of pure cultures and mixtures of enteric microorganisms upon. Abstract. (No abstract.)..... 265
Athlete's foot, A method for the evaluation of water-soluble and water-miscible fungicides used in the prevention of the spread of. Abstract... 37
Atypical pneumonia, Isolation of a virus from four cases of, by the intranasal inoculation of mice. Abstract..... 58
Aughtry, H. D., Jr. and Wilson, J. K. The action of *Rhizobium* on tissue containing selenium. Abstract..... 274
Ayres, Gilbert B., and Tobie, Walter C. The non-assimilability of α-hydroxyisobutyric acid ("Hib acid") by molds and other microorganisms. Abstract..... 43
Azotobacter, Hydrogen inhibition of nitrogen-fixation by. Abstract..... 86

Bacillary dysentery, Application of bacteriophage determinations to laboratory diagnosis of. Abstract..... 687
Bacteria, A quantitative study of environmental factors involved in survival and death of, in the desiccated state..... 109
— from a single cell, Motion pictures of the development of. Abstract. (No abstract.)..... 275
Bacterial cell, Structural differentiation within the, as shown by the electron microscope. Abstract..... 25

Bacterial content, The, of the air of operating rooms. Abstract..... 270
— endocarditis, A comparison of the therapeutic response to the *in vitro* inhibitory effect of various sulfanilamide compounds on organisms isolated from patients with. Abstract..... 81
— fixation of CO_2, Heavy carbon as a tracer in. Abstract..... 20
— forms, Pictures of, taken with the electron microscope. Abstract..... 260
— growth, The correlation of, with oxygen consumption..... 549
— metabolism, Occurrence of the aldolase equilibrium in. Abstract..... 21
— morphology as shown by the electron microscope. I. Structural differentiation within the streptococcal cell..... 415
— pigments, The estimation of the production of, by the use of the spectrophotometer and the photoelectric colorimeter. Abstract..... 46
— population, The effect of culture environment on results obtained with the dilution method of determining..... 355
— spores, The killing of, by shaking with abrasive materials. Abstract.... 47
Bactericidal agents, Selective. Abstract..... 269
— effect of ultraviolet radiation..... 745
— effect, The, of cultures of aerobic sporulating bacilli on gram-negative organisms. Abstract..... 32
— substances, The isolation of soil bacteria that produce. Abstract..... 33
Bactericidins of the domestic fowl, Studies on the normal. Abstract..... 102
Bacteriological examination, A method for the, of flat surfaces. Abstract.. 273
— research, A new tool for. The electron microscope..... 397
Bacteriophage, A study of the neutralization of, by antibacteriophage serum. Abstract..... 60
—, Antigenicity of purified. Abstract. (No abstract.)..... 275
— determinations, Application of, to laboratory diagnosis of bacillary dysentery. Abstract..... 687
—, Effect of, in experimental staphylococcal septicemia in rabbits. Abstract..... 61
Bacteriophages, Isolation and characteristics of, for staphylococci of bovine mastitis..... 447
Bacterium coli mutabile, The nature of the lactase of, as determined by studies of mixed populations. Abstract..... 29
— *globiforme* and diphtheroid types of soil microorganisms, Cell inclusions of. Abstract..... 86
— *radiobacter* (Beijerinck and Van Delden) Löhnis, A characterization of... 193
Bahler, D. R., Hodes, S. S., and Hartsell, S. E. Studies on the normal bactericidins of the domestic fowl. Abstract..... 102
Baker's yeast in grain wort, The effect of copper on the growth of a strain of. Abstract..... 94
Baldwin, I. L., and Hanson, A. M. The effect of copper on the growth of a strain of baker's yeast in grain wort. Abstract..... 94
—, VanLanen, J. M., and Riker, A. J. Comparisons of crown gall bacteria having normal, attenuated, and restored virulence. Abstract..... 95
Bartram, M. T., Welch, H., and Ostrolenk, M. The role of rats in the spread of food poisoning of the *Salmonella* group. Abstract. (No abstract.).... 265
Beahm, Edgar H., and Jorgensen, Myron N. The blood picture in *Trichinella*-infested dogs. Abstract..... 76

Beck, M. Dorthy, Eaton, Monroe D., and Pearson, Harold E. Isolation of a virus from four cases of atypical pneumonia by the intranasal inoculation of mice. Abstract 58
Berens, Conrad, Chapman, George H., and Stiles, Merritt H. The coagulation of plasma by staphylococci 431
Berkman, Sam, and Koser, Stewart A. Accessory-growth-factor requirements of the genus *Pasteurella*. Abstract 38
Bernheim, Frederick. The effect of various substances on the oxygen uptake of the tubercle bacillus 387
Berry, Caroline, Sandholzer, Leslie A., and Ferguson, Mary V. Methods suitable for the bacteriological examination of shellfish and sea water. Abstract 98
Beta-hemolytic streptococci, Cross-protection between different agglutinative types of. Abstract 70
Bio-assay, The, of pantothenic acid employing *Proteus morganii*. Abstract 39
Biological therapy in mycotic infections. Abstract 270
Biotin, bios II_b and vitamin H, The influence of, on the growth of several strains. The nutrition of *Staphylococcus aureus* 173
— synthesis by microorganisms. Abstract 40
Birkeland, Jorgen M., and Green, Thomas W. The germicidal action of cetyl pyridinium chloride on bacterial spores. Abstract 34
Black, L. A. The probable identity of diphtheroids isolated from aseptically-drawn milk with *Corynebacterium bovis* and *Bacterium lipolyticum*. Abstract 99
Blood groups, Facts on, and the use of blood plasma as a substitute for whole blood in transfusions. Abstract 276
— plasma, Facts on blood groups and the use of, as a substitute for whole blood in transfusions. Abstract 276
— platelets in anaphylaxis. Abstract 63
Blubaugh, F. Clair, Schwab, John L., and Woolpert, Oram C. The response of mice to the intranasal inoculation of mixtures of *Streptococcus hemolyticus* and influenza virus. Abstract 59
Blubaugh, L. V., Gerwe, E. G., Botts, C. W., and Helwig, H. L. Further observations on the germicidal activity of cetyl pyridinium chloride. Abstract 34
Bogen, Emil. The detection of tubercle bacilli by fluorescence microscopy. Abstract 266
Bohls, S. W., Irons, J. V., and Hartman, T. L. Comparative susceptibility of embryonic chick's chorio-allantoic membrane and rabbit's eye to variola virus. Abstract 55
Bohonos, Nestor, Hutchings, Brian L., and Peterson, W. H. The activity of vitamin B_s analogues for lactic acid bacteria. Abstract 40
Bolyn, A. E. The effect of an emulsion of lanolin on the toxicity of the venom of *Crotalus horridus*. Abstract 269
Borman, Earle K., Robinton, Elizabeth D., and Stuart, Charles A. A study of standard methods for the detection of the coliform group in raw and treated surface water supplies. Abstract. (No abstract.) 686

Botts, C. W., Blubaugh, L. V., Gerwe, E. G., and Helwig, H. L. Further observations on the germicidal activity of cetyl pyridinium chloride. Abstract 34
Botulinus-toxin-producing areas in western duck marshes, Detection of potential 363
Bovine mastitis, Isolation and characteristics of bacteriophages for staphylococci of 447
Branham, Sara E., Hitchens, A. Parker, and Root, Manley B. A study of the "skin test" with meningococcal toxins in a group of boys. Abstract .. 71
—, — and —. Studies on the bactericidal and phagocytic activity of normal human blood on meningococci in relation to the "skin test" with meningococcal toxins. Abstract 72
Breslove, Beverly B., Koser, Stewart A., and Dorfman, Albert. Accessory-growth-factor requirements of *Brucella*. Abstract 37
Brick cheese, The control of "early-gas" in. Abstract 547
Brode, Wallace R., Sesler, Clara L., and Stahly, G. L. The estimation of the production of bacterial pigments by the use of the spectrophotometer and the photoelectric colorimeter. Abstract 46
Bronfenbrenner, J., and Hershey, A. D. Quantitative aspects of the phage anti-phage reaction. Abstract 785
—, Kalmanson, George M., and Hershey, A. D. A study of the neutralization of bacteriophage by antibacteriophage serum. Abstract 60
— and Sulkin, S. Edward. Effect of bacteriophage in experimental staphylococcal septicemia in rabbits. Abstract 61
Bronson, L. H., and Parker, R. F. Neutralization of vaccine virus by immune serum: Titration by intracerebral inoculation of mice. Abstract 264
— and —. The neutralization of vaccine virus by immune serum: titration by the intracerebral inoculation of mice. Abstract 56
Brown, W. H., and Elliker, P. R. Factors affecting the mold content of cream. Abstract 271
Brucella abortus, Bacterial dissociation of. Abstract. (No abstract.) 265
—, Accessory-growth-factor requirements of. Abstract 37
—, *Pasteurella tularensis*, and *Proteus* agglutinins in chronic brucellosis 593
—, Studies with a biologically active carbohydrate from. Abstract 70
Brucellosis, *Brucella*, *Pasteurella tularensis*, and *Proteus* agglutinins in 593
Buchbinder, Leon, Solowey, Mathilde, and Phelps, Earle B. The survival rates of streptococci exposed to natural (daylight and sunlight) and artificial light in simulated room environments. Abstract 79
Burdon, Kenneth L. A new procedure for determining changes in serum antitrypsin associated with allergic reactions. Abstract 62
Burgdorf, A. L., and Wheeler, K. M. Application of bacteriophage determinations to laboratory diagnosis of bacillary dysentery. Abstract 687
Burris, R. H., Phelps, A. S., and Wilson, P. W. The adaptation of the root-nodule bacteria to certain substrates. Abstract 85
Bushnell, L. D., and Haas, H. F. Microbial fermentation of petroleum products. Abstract 24

Bushnell, L. D., and Haas, H. F. The utilization of certain hydrocarbons by microorganisms 653
Butter, Mold mycelia in. Abstract 271

Cabbage juice, Germicidal activity of. Abstract. (No abstract.) 275
Calder, Royall M. *Brucella, Pasteurella tularensis*, and *Proteus* agglutinins in chronic brucellosis 593
Cantor, Abraham. The maintenance of aerobic, microaerophilic and anaerobic conditions in a Petri dish 155
Carbohydrates and sugar acids, Utilization of, by the rhizobia 323
Carlyle, Ralph Elmer, and Norman, Arthur Geoffrey. Microbial thermogenesis in decomposing plant materials. Abstract 92
Carlyle, R. E., and Norman, A. G., Microbial thermogenesis in the decomposition of plant materials. Part II. Factors involved 699
—, Norman, A. G., and Richards, L. A., Microbial thermogenesis in the decomposition of plant materials. Part I. An adiabatic fermentation apparatus 689
Carpenter, Charles M., and Wingate, Harold F., The "sulfanilamide death time" *in vitro* of 106 strains of the gonococcus 473
Casman, E. P., The effect of alcohol on the bactericidal action of certain germicides. Abstract 35
Cations, The influence of, upon the survival of gram-positive bacteria in distilled water. Abstract 28
Cell division, Observations on the, of some yeasts and bacteria 141
— inclusions of *Bacterium globiforme* and diphtheroid types of soil microorganisms. Abstract 86
Cellulose, Fermentation of, by microorganisms associated with termites. Abstract 268
Cellulose-splitting bacteria isolated from human stools. Abstract 78
Central New York Branch, S. A. B. Proceedings 272
Cetyl pyridinium chloride, Further observations on the germicidal activity of. Abstract 34
— pyridinium chloride. The germicidal action of, on bacterial spores. Abstract 34
Chandler, Asa C. and Lee, Melba. A study of the nature, growth and control of bacteria in cutting compounds 373
Chapman, George H., "Culturally typical" food-poisoning staphylococci in persons with low-grade illness. Abstract 74
—, Berens, Conrad, and Stiles, Merritt H., The coagulation of plasma by staphylococci 431
Chase, Elizabeth C., Sherman, J. M., and Niven, C. F., Jr., Variability in streptococci of group B. Abstract 101
Chlorinated water, Some characteristics of a coli-like organism isolated from. Abstract 89
Chlorine, The effect of H-ion concentration and of ammonia on the germicidal efficiency of. Abstract 89
Chorio-allantoic membrane of the developing chick, Tuberculosis (human and avian) and leprosy (rat); experimental production in the. A preliminary report. Abstract 786
